Civil/Environmental Engineering Internship  
UVA Facilities Management  
Environmental Resources  
Beginning Summer 2017

The Environmental Resources Group (ER) within UVA Facilities Management is looking to fill a paid student internship position beginning summer 2017. In this position, this person will have the opportunity to work in a professional organization that manages environmental compliance programs for UVA. Specifically ER is responsible for stormwater and air permitting programs; construction site erosion and sediment control, and stormwater pollution prevention plan inspections; stormwater BMP inspections and maintenance; stormwater management planning and design; environmental impact reviews; petroleum storage management; and many other areas. While the focus of this position will be stormwater management/engineering, this person will have opportunities to view and participate in the other programs.

Requirements
- Student at UVA graduating 2018 or later
- Rising 3rd or 4th Year in civil/environmental engineering
- Good academic standing
- Excellent references from faculty and/or previous employers
- Ability to work full-time through the summer (vacation allowed)
- Ability to work next school year part-time (flexible – 0 to 10 hours/week)
- Good communication skills
- Strong work ethic
